

These illustrations demonstrate how the MERC®System units operate. Shown in the MERC®System layouts are the MRS Cadaver Racks and Cadaver Transfer Boards. These drawings also illustrate the portability of the MERC®Systems as they can be fully operational almost anywhere. Minimal operation space is highlighted in red. The dimensions are estimated and will vary based on equipment. Dimensions are based on use of MRS 24" Cadaver Storage Racks and also include space for the MERC®System units.
